

DO NOT DISTURB!

Nassau Grouper SPAWNING!

**between
November
and March**

**SUPPORT OUR FISHERMEN
by choosing other fish during the
Nassau grouper breeding season.
This will allow the Nassau grouper
to reproduce so we will have
more fish in the future**

For more information contact
the Dept of Marine Resources at 393-1777, BREEF at 327-9000 or www.breef.org

From November to March, Nassau groupers aggregate in large numbers at predictable places and times to mate and spawn, making them vulnerable to overfishing.

The Nassau grouper has already been fished-out in neighbouring countries. We need your help to make sure this does not happen in The Bahamas.

YOUR ACTIONS CAN AFFECT THE LONG-TERM HEALTH OF OUR ECONOMY!
